Summary

I am a software engineer specialising in React, Vue 3, and TypeScript with 7 years' experience delivering enterprise web products for global clients like Netflix, Twitch/Amazon, and early-stage start-ups.

Career history

Software Engineer at rppl.app

June 2024 – Present

Early-stage hire shaping the entire Vue 3/TypeScript codebase for a workspace-management SaaS.

Key contributions

- Architected a Vue 3 component library and led front-end development
- Built application UI/UX
- Built front-end integrations with Firebase/Firestore
- Met tight release deadlines for demos and funding rounds

Software Engineer at CloudCannon (Netflix, Twitch/Amazon Contractor)

July 2018 – June 2024

Senior front-end lead for enterprise clients including Netflix, Twitch/Amazon, and PaperCut. Led the planning and delivery of React/Next.js apps and large-scale static sites with global reach.

Key contributions

- Led and maintained two React/Next.js applications for Netflix
- Scoped, costed, and delivered websites to enterprise customers including Netflix, Twitch/Amazon, PaperCut etc.
- Met tight deadlines and release cycles for high impact launches
- Managed high-stakes projects, retaining 100% of enterprise customers
- Mentored, trained and onboarded new staff
- Managed CloudCannon's support services, bug bounty programme and company policies

Interests

- Beekeeping, Biking, Guitar
 - Web, software and mobile app development
-

Director at Meddle

December 2010 – Present

In my own time I run [Meddle](#), my personal web development agency building websites for local businesses. I have also built several [desktop and iOS applications](#).

Team Leader at Community Care Trust (CCT)

March 2013 – July 2018

Managed a 30+ person team delivering services to 100+ clients. I designed and maintained the organisation's information systems, mentored staff, and consistently hit all operational KPIs.

Key contributions

- Led a large team, recruiting, training, rostering, and running performance reviews
 - Built digital scheduling and reporting systems, boosting productivity and giving clear KPI visibility
 - Managed stakeholder communications, government compliance reporting, and all service documentation/policies
 - Conducted client assessments and ensured services met regulatory and quality standards
 - Resolved complex staff and client issues through clear communication and creative problem-solving
-
